

Lists, Arrays & Dictionaries

Software Engineering 1

Dr Swen E. Gaudl

University of Plymouth 2022

Prep For Thursday:

- Come with questions!
- Work through the exercise during the session to get help.

COMP1000 Agenda This Week:

- Arrays
- Lists
- Dictionaries
- Q&A

Arrays

```
int[] array = new int[] {10, 20, 30, 40};
```

```
int[][] matrix = new int[5][];  
foreach (int[] row in matrix)  
{  
    row = new int[5];  
}
```

Arrays

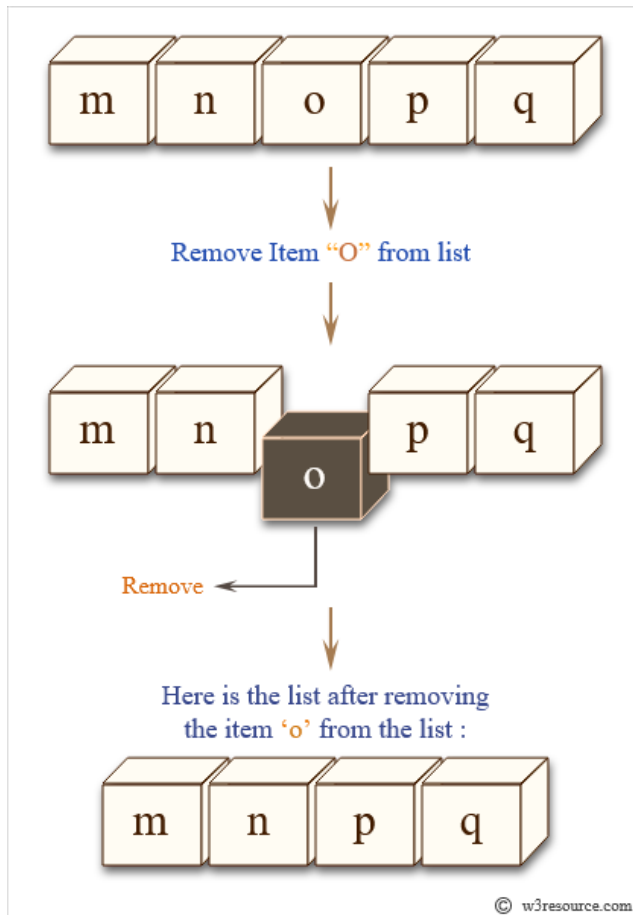

```
int[] array = new int[] {10, 20, 30, 40};
```

```
int[][] matrix = new int[5][];  
foreach (int[] row in matrix)  
{  
    row = new int[5];  
}
```

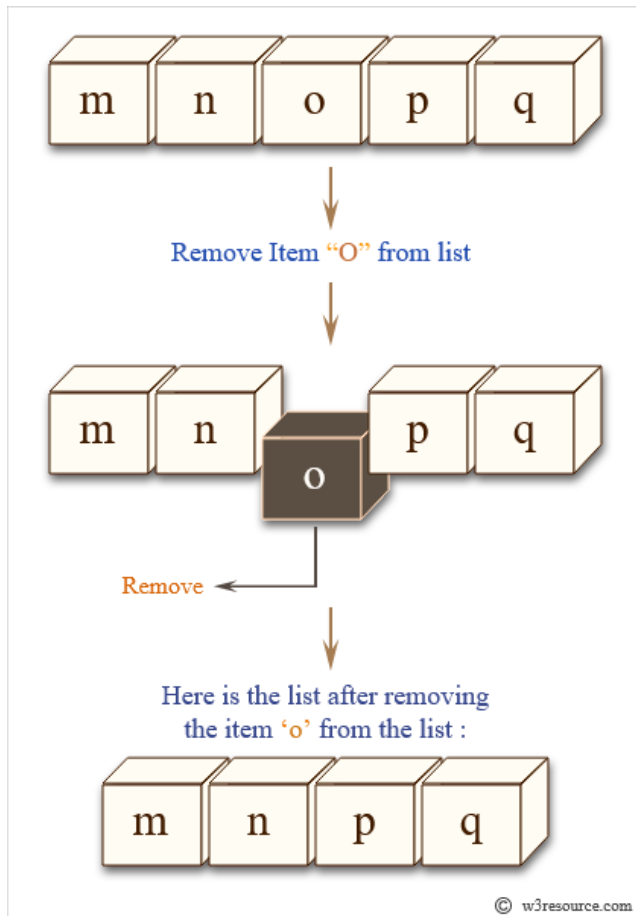

```
int[][] matrix = new int[5][];  
for (int x=0; x< matrix.Length;x++)  
{  
    matrix[x] = new int[5];  
}
```

List<T>

```
List<float[]> weatherData = new List<float[]>();  
for (int x=0;x<5;x++)  
{  
    float[] values = new float[5];  
    values[0]=19.1f;  
    values[1]=18.5f;  
    weatherData.Add(values);  
}  
weatherData.First()[0]=69.69f;
```

List<T>

```
List<float[]> weatherData = new List<float[]>();  
for (int x=0;x<5;x++)  
{  
    float[] values = new float[5];  
    values[0]=19.1f;  
    values[1]=18.5f;  
    weatherData.Add(values);  
}  
weatherData.First()[0]=69.69f;
```

Dictionary<Key,Value>

Keys	Values
B	21
F	43
A	6
D	54
C	65
E	3

Keys	Values
A	6
B	21
C	65
D	54
E	3
F	43

```
Dictionary<int, string> phoneBook = new Dictionary<int, string>();  
phoneBook.Add(666222, "Cab Service");  
phoneBook.Add(999, "Emergency Hotline");  
phoneBook.Add(2512, "Santa Box");  
Console.WriteLine(phoneBook[2512]);
```

Data Types: Int, Char, Float & Arrays[1]

```
string word = string.Empty;
char letter = 'A';
char[] letters = new char[5];
letters = new char[]{'a', 'b', 'c', 'd', 'e' };

for (int i = 0; i < letters.Length; i++)
{
    letters[i] = 'a';
}
word = new string(letters);

List<char> letterList = new List<char>();
foreach (char l in letters)
{
    letterList.Add(l);
}
```

Data Input/Output

```
Console.WriteLine("Move a Move: ");  
ConsoleKeyInfo name = Console.ReadKey();  
Console.WriteLine("You pressed {0}", name.KeyChar);  
string message = Console.ReadLine();
```

File Input/Output

Buffered and Asynchronous Reading
